

Enclosed Type Three Phase Variac 450V 20A

Three Phase Variac 450V 20A

This series voltage transformers are fully housed thus providing protection from the physical accidents, and other hazards. Generally they are used wherever adjustable AC voltage is required. Output voltage is precisely controlled. Output voltage is controlled with a large, slip-protected knob. Output voltage is increased linearly as the knob is turned clockwise. All models are equipped with power cord, illuminated on/off switch and external PE terminal. They are marked with output voltage in volts (corresponding to nominal input voltage).

They can be conveniently moved around the laboratory, production or equipment service area to provide adjustable voltage.

All models are suitable for 50Hz frequency range.

Specification

Type	450/20
Voltage	450V
Current	20A
Power	15600VA
Dimensions	318 x 520 x 348mm
Weight	56kg
