

Single Phase 3.6kVA Variac, 1 Output, 240V ac, 15A

Single Phase 3.6kVA Variac, 1 Output, 240V AC, 15A

Features:

- Carroll & Meynell
- Open & Enclosed 'Varivolt' Transformers
- Manual or motor driver applications
- Variable Auto Transformers
- Continuously variable alternating current (a.c.) output voltage
- Rugged construction
- Low operating torque
- High efficiency/excellent regulation
- Silver-plated commutator
- Low magnetising current
- No waveform distortion, smooth linear output & overload capacity
- Screw terminals
- Complete with knob and dial

Specifications:

- Depth 190mm
- Dimensions 257 x 220 x 190mm
- Length 257mm
- Number of Outputs 1
- Number of Phases 1
- Power Rating 3.6kVA
- Primary Voltage Rating 240V ac
- Secondary Current 15A
- Secondary Voltage Rating 0 → 240 V ac, 0 → 270 V ac
- Termination Type Screw, Stud
- Weight: 16kg
- Width: 220mm

Excludes:

- Gauges
- Wiring
